

FIBER SPLICING WORKSTATION LEVELING KIT

U-TECK's new Workstation Leveling kit allows for the quick leveling of the worksurface on uneven ground, around ditch cuts, rights-of-way, and is a great feature for emergency restoration. Made from strong composite, the leveling kit features angled feet with grip pattern surface.

Installation:

- **Quick Installation:** Slide the leg extensions over each leg for easy setup.
- **Adjustable Positioning:** Use the retainer clips to secure the leg extensions at the optimal height for the best leveling arrangement.
- **Height Adjustment:** Increase the overall working height up to 2.5" inches.
- **Compatibility Note:** Leg extensions are not compatible with the wheel kit accessory.
